PUZZLING PINTS

Mother told the children that if they could show her how to put a pint in the three-pint bottle and a pint in the five-pint can they might drink five pints of the nine pints of cider in the jug. How did the youngsters gain the reward by the simplest method without resorting to guesswork in measuring or using other receptacles than those shown in the picture?

PINTS

ANSWER TO CLOTHES-LINE PUZZLE.

Since one, piece of the clothes line was equal to five-sevenths of the other, the entire length of 100 feet divided by 1 5-7 will give the length of Mrs. Hogan's share as 58 1-3 feet and the balance, 41 2-3 feet, belonged to Mary O'Neill.
